PROFESSIONAL SUMMARY

I'm a full-stack web developer from Cairo with 3+ years of experience turning complex ideas into clean, high-performance digital products — from PHP/Laravel backends to ReactJS front ends, with a security-conscious approach to every build. I care deeply about code quality, user experience, and shipping things that actually work beautifully.

EXPERIENCE

IYNA Oct. Chapter, Full-Stack Developer *March 2024 - January 2026*

- Beyond the public-facing website, built and maintained the internal tooling IYNA relies on each admissions cycle — from the applicant-facing portal to the systems the review team and administrators use behind the scenes.

Youth Science Journal, Full-Stack Developer & Server Admin *March 2024 - January 2026*

- Worked with YSJ across two full seasons, reusing and adapting the same platform architecture built for IYNA — proving the system out as a scalable base rather than a one-off build.

PROJECTS

TutCare — Accessibility App Website *Live at: tutcare.com*

- Website for TutCare, an accessibility app that helps visually impaired and mobility-challenged people connect with helpers. Built with React and Vite, with support for 23 languages, dark and light modes, scroll-triggered animations, and a realistic phone mockup in the hero.

Tut Wonders — Digital Agency Website *Live at: tutwonders.com*

- Website for Tut Wonders, a Cairo-based digital agency. Built in React with a six-language switcher (English, Arabic, French, Spanish, German and Russian), full right-to-left support for Arabic, SEO, and project inquiry forms that submit through a Google Apps Script webhook.

EMBER — Restaurant Website *Live at: eyadwebdeveloper.github.io/ember-resturant*

- Immersive fine-dining website for Cairo's most celebrated restaurant. Features a split-screen cinematic hero, custom cursor system with trailing ring, page loader with progress bar, skeleton image loading, interactive menu tabs with panel switching, a full reservation form with validation & confirmation flow, and scroll-triggered reveal animations throughout.

IYNA Oct. Official Website *Live at: iyna-oct.com*

- Official website for a real published organization — the International Youth Neuroscience Association Oct. Chapter. Full production site built and deployed live.

YS Journal Official Website *Live at: ys-journal.org*

- Official journal website for a real published organization, built entirely with React.js and deployed live — a modern, responsive publication platform.

Al-Noor Travel — Tourist Website *Live at: eyadwebdeveloper.github.io/al-noor-travel*

- Premium Hajj & Umrah travel platform with luxury package showcases, immersive hero, multi-step booking UI, and full Arabic RTL support.

Climate Cast App *Live at: climate-cast-app.vercel.app*

- Real-time weather dashboard with 7-day forecast, location search, and beautifully animated condition displays. Deployed on Vercel.

CERTIFICATES

Verified Certificates & Achievements *View all at: tinyurl.com/eyad-certificates*

- A curated collection of my completed courses and professional certifications, available online for review.

TECHNICAL STRENGTHS

Front-End	HTML, CSS, JavaScript, React.js, TypeScript
Back-End	PHP, Laravel, SQL / MySQL
Systems & Tools	Git, Linux & Server Management, Basic Accounting (MS Office)
Security	Penetration Testing (basics)
Other	Spreadsheets, Documentation, Presentation, Data Entry

SOFT SKILLS

Communication · Teamwork · Problem Solving · Time Management · Attention to Detail · Adaptability

LANGUAGES

Arabic	Native
English	Mid-Level
